PROMOTING 5TH SPACES FOR YOUTH LEADERSHIP

ComMutiny : The Youth Collective (CYC)
is a coalition of 35 (& rising) youth-led
and youth engaging organizations across
India working towards promoting
empowering spaces for youth leadership,
called the 5th Space.

The 5th Space experience is central to
all the work at CYC.

One of our key strengths is to conceptualise and implement country wide public initiatives using 5th Space principles. These public initiatives enable young people to engage in deep reflection and advocate for specific issues in a way that ensures youth participation in promoting democracy, social inclusion and gender justice. All our public initiatives have been hailed as unique initiatives that have reached lakhs of people and received tremendous attention from media.

The outreach in past years have been intense and with a variety of products and initiatives we have reached out to young people and youth workers across different demographics. Onground dissemination of films through Moving People with Movies is an innovation that has helped in consolidating 5th Space films into learning tools for youth workers. Several efforts have been made in the direction of developing and streamlining internal processes such that they strengthen team learning and organisational development. Key members of the organisation have participated in the Saanatha Journey, which has helped in the review, analysis and planning of the internal processes based on organisational values and team members aspirations.

AWARDS AND ACCOLADES

A short animation film around how feelings are attended in today's society. The film has won 5 national and international awards. It honors the core feelings of love, freedom, growth, ownership and social hope and subtly brings out how 5th Space is not a philosophy or a theory, it is an experience where we value feelings more than anything else.

This publication researched five common civic issues across diverse demographic groups and the findings indicated that the psychosocial approach or mindset change was the most needed intervention.

Youth In Governance

The purpose of this study was to come out with a status report of young people in governance at three levels- nomination, election and representation in cabinet, and also indicate trends which in turn could inspire us to think of creative solutions to increase youth participation in governance.

Youth Work in the Commonwealth
