

# LEARNING I

## Learning Goals

---

Set a group learning goal to be accomplished then and there (for example, a song or a few lines of a new language or some dance steps etc.) that you will perform and display in the larger circle at the end.

Together make a chart with skills of each person mapped. Now add 3 new skills that each person wants to develop.

What is my dream profession? Share this with the group and elaborate on the capacities that you have to learn to perform well in that role. Let others add their wisdom.
